

Priya modified the bootcamp project. Akanksha created the html files. Priya and Akanksha updated the Github repo.

Akanksha updated the following:

```
def generate(question,anthropic,conn):  
  
    sparql = write_query({"question": question},anthropic)  
  
    response = execute_sparql(sparql,conn)  
  
    answer = summarize_info(question, response,anthropic) # This response will be sent to the  
    frontend  
  
    return answer["final_answer"]
```

Priya updated the following:

```
def question_view(request):  
  
    answer = ""  
  
    document_link = None  
  
    anthropic,conn = setup() #Setup the database and the LLM
```
